

NOTE XLII.

BIRD-MARKING IN THE NETHERLANDS.

II.

RECOVERY OF MARKED BIRDS

BY

Dr. E. D. VAN OORT.

In addition to my first paper on this subject on page 55 of the present volume, I give here an enumeration of recoveries of birds, marked on account of the Leyden Museum in 1911 as well as in 1912. The number of the birds marked in 1912 is considerably surpassing that of them marked in 1911. I cannot give now the exact number of marked birds nor a complete list of the species, as many of our co-operators did not yet send to me the filled-in schedules.

***Platalea leucorodia* L.**

Ring n^o 299, marked 1 June 1912 at Callantsoog, province Noord-Holland, as a nestling by Mr. A. Kos; found dead in the marshes at Reculver near Herne Bay, Kent, Southeastern England, at the beginning of August 1912. Reporter Mr. H. W. Hall, Herne Bay.

— 304, marked 1 June 1912 at Callantsoog as a nestling by Mr. A. Kos; shot at Cabourg,
